

producer Giving you the power to manage your organisation's web content.

Fireworkx "Producer" Content Management System enables companies to develop and manage Internet and Intranet websites easily and cost-effectively.

Producer is an easy to use, highly functional and powerful web Content Management System (CMS). This is achieved through a number of well-crafted plug-ins, including e-commerce and cataloguing, address books and contact lists, graphing and reporting, and many others.

Features

- Browser-based content creation and editing
- Real-time page creation
- Centrally-controlled site design, using templates
- Dynamic content repository including Database Management
- Workflow with email notification
- Web-page version tracking and history
- Web-page publication scheduling

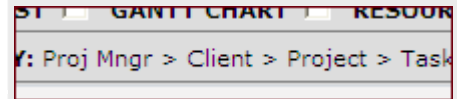

Producer offers the following advantages

- Easy way for authorised employees to manage content
- Cost saving - owners of content can update information seamlessly
- Staff buy-in as they are empowered and accountable for their content
- Real time content editing
- Speeds the approval process by emailing all the involved parties to take action when required
- Enables business users to quickly make change, increased quality and accuracy
- Business users are best placed to own and manage the information as they are both content experts and users
- Producer provides templates and site structure tools that help enforce centralised control over the site and corporate branding

Firework TABS is an entirely web-based Project Management System.

- Log in from anywhere: Office, Home or Client
- Manage your projects
- Check time lines & deadlines
- Allocate Tasks to a Project
- Project & Task reporting
- Generate Project Gantt Charts

Business success is not achieved through brilliant strategy. It is achieved through the brilliant execution of strategy. In fact, the **execution of strategy** is more important than strategy itself.

Fireworkx has developed a browser-based BSC application that integrates with TABS. This unique capability brings strategy and operations together.
